

HILL MEDICAL SKIN & HEALTH

Private GP Service with Dr Qumer Younis

Dr Qumer Younis MB ChB is a General Practitioner who offers a regular private GP service at the clinic.

Dr Younis qualified in 2008 from the University of Sheffield. Since qualifying, he has worked extensively in the local hospitals during his training. He has been a GP for over 10 years in various practices across the city. He is a member of the Royal College of General Practitioners and is also a member of the Royal College of Pathologists.

Dr Younis has special interests including acute and urgent medical care, gastroenterology, mental health, pain management and palliative care. Dr Younis is passionate about providing accessible and timely General Medical Care to the local population. He has an extensive knowledge of local services and can provide onward referral if needed.

Your journey begins with a consultation (which can be carried out by either a video call or in clinic face to face) and includes an individual health assessment, an in-depth discussion of your concerns/symptoms, review of your medical history, family history and suitable treatment options.

Our Aim

The Clinic offers a private, self-pay service as an alternative to the NHS provision. Our aim is to ensure you receive up to date, accurate and unbiased evidence-based care. We have designed the service to be flexible. You may choose to have the initial consultation with Dr Younis and share your treatment plan with your GP to continue your care and obtain your medication via the NHS, or you may choose to remain a private patient with Dr Younis. You can opt in or out at any time, providing you consent to allow us to keep your GP informed.

Your Safety

The Clinic is registered with and regulated by the Care Quality Commission, which means the care provided and the professionals who deliver it meet the government standards for quality and safety. Consultations and treatment are delivered in accordance with the NICE (National Institute for Health and Care Excellence) Guidelines.

Your Choices

Your journey begins with a 15 minute consultation (which can be carried out by either a video call or in clinic face to face) and includes an individual health assessment, an in-depth discussion of your concerns/symptoms, review of your medical history, family history and suitable treatment options.

During Your Consultation, our aim is to help you:

- Sign post you to other services where appropriate
- To make informed decisions and create a bespoke treatment plan together
- Identify potential treatment side effects and manage your expectations
- Consider the risks and benefits of each treatment
- Improve your health

We prefer to see you face to face as it makes it much more personal and we can also check your blood pressure and pulse if needed.

Your Treatment & Care

Treatment may include:

- Lifestyle changes – to improve your health
- Onward referral to specialist care if a need is identified

Ongoing Care

Your consent is required for us to share the outcome of your consultation and any prescribing decisions with your GP, to ensure you receive safe and consistent care across the private and primary healthcare sectors. You may choose to continue receiving your care and treatment privately with Dr Younis. However, if you prefer, with your consent Dr Younis can request that your own GP takes over your care at any point. With your consent your GP will receive a copy of your treatment plan to help convey the option you would like to proceed with.

Booking an Appointment

To book your appointment, please call the clinic on 0114 235 1193 or email us at info@hillmedical.co.uk

Please check our Terms & Conditions for additional information, you can find this on our website.
